To Whom it May Concern:

It is with great pleasure that I recommend Susan Gerlovina to your program. Susan is a Registered Behavior Technician at A Friendly Face, a treatment center that provides Applied Behavior Analysis to children with Autism Spectrum Disorder. She has been with the company for 3 years, handling some of our most involved, non-verbal students with autism. Susan has exhibited not only competence in the application of ABA, she has also exhibited a level of dependability and commitment that is hard to find. She can be relied on to implement interventions accordingly and effectively, and analyze reportable data to her supervisors with great accuracy.

Because of her dedication and commitment and innate passion for children with special needs, I have no doubts that Susan will excel in any academic institution she wishes to join.

I wish her nothing but the best in all her endeavors.

Please don't hesitate to contact me if you have any questions or concerns.

Sincerely,  
Anna Marie Dorelien, MEd., BCBA, LBA  
Clinical Director
